

ASTHMA

COMMON CHILDHOOD AILMENTS

SYMPTOMS

Asthma is a common lung condition that can create breathing difficulties. Symptoms include: a tight chest, wheezing, coughing and breathlessness.

INCUBATION

Asthma is not contagious.

TREATMENT

You may be prescribed an inhaler or medicine to help your symptoms.
Reliever inhalers – usually blue, used as needed to quickly relieve asthma symptoms for a short period of time.
Preventer inhalers – a steroid medicine, taken every day to prevent asthma symptoms happening.

TOP TIPS

Asthma can sometimes get worse for a short time, this is known as an asthma attack.

Make sure caregivers/school/nursery are aware and have any medication or inhalers on site. Talk to them regularly so they know what to look for and what to do.
